GAURAV PAWAR

Founder | Product, Design & Growth | Hands-on Builder

Hyderabad, India | gauravpawar3102@gmail.com | numbnoodle.com
linkedin.com/in/gaurav-9b1655198 | github.com/numbnoodle | x.com/numbnoodlee

SUMMARY

Founder who has taken a product from idea to thousands of active users. Run Coins.me end to end, covering user research, product strategy, UX, engineering, and growth, reaching ~5K monthly and ~500 daily active users. Previously one of three on the P2P.me founding team, helping scale it to 250K users and $60M+ in volume across 15+ countries. Brings a founder's bias for shipping and an engineer's sense of what it takes to get there.

EXPERIENCE

Coins.me | **Try it live: app.coins.me**
Founder | Product, Engineering & Growth

- Founded Coins.me, a progressive web app (PWA) that helps people in markets with currency instability save and spend in dollars.
- Researched users, problems, and market opportunities; defined the product vision and translated it into a prioritized roadmap.
- Designed the UX flows and UI in Figma and built the product hands-on as the sole engineer, from frontend and backend APIs to the data layer and deployment, iterating quickly on usage data and user feedback.
- Planned the Coins.me 2.0 go-to-market: creator launch playbook, video briefs, and region-specific marketing and app campaigns.
- **Traction:** ~5K monthly active users and ~500 daily active users globally.

P2P.me | **Try it live: p2p.me** Jun 2023 – Sep 2026
Founding Engineer

- Part of the three-person founding team (with two co-founders) that took the product from early-stage idea to a live platform across 15+ countries.
- Designed the P2P.me app (UX flows and UI) and contributed hands-on across development and deployment, turning user needs and product ideas into shipped features.
- Contributed to distribution and marketing campaigns across multiple countries, connecting product work to adoption and growth.
- Worked cross-functionally with the co-founders in a resource-constrained environment, taking ownership without waiting for detailed specs.
- **Company outcomes, as part of the founding team:** 250K users, 30K+ monthly active users, $60M+ in cumulative transaction volume, and operations in 15+ countries; the company raised ~$8M.

EatX | Bengaluru, India Dec 2022 – Jun 2023
Full-Stack Software Engineer

- Built web application features in React.js and Redux, owning frontend implementation and contributing to UI/UX design decisions.
- Delivered cross-platform mobile projects using Ionic and Vue.js.

FITPEO Inc. | Florida, USA (Remote) Apr 2022 – Jun 2022
Web Development Intern

- Contributed to building new products from scratch under the direction of the CTO, working with the lead developer to deliver projects on schedule.

SKILLS

Range: Design to deployment and beyond: user research, Figma, frontend, backend, smart contracts, infra, analytics, and growth. Picks up any new stack fast.

Product & Growth: Product strategy, user research, roadmapping, go-to-market, creator and app campaigns, Amplitude Analytics

Design: Figma, UI/UX design, product design, wireframing

Engineering: JavaScript, React.js, React Native, Node.js, PostgreSQL, MongoDB, Solidity, Cloudflare, AWS

Tools: Git, GitHub, Claude Code

EDUCATION

Bachelor's degree, Computer Science and Engineering Aug 2019 – Jun 2023
Methodist College of Engineering & Technology, Hyderabad
